

NANOVIS — PRESENTED BY AUTOMARK

# ULTRASONIC US-500

Compact cleaning station for UV & solvent-based inks

ECO FRIENDLY

VOC FREE

DURABLE AGENT

EFFICIENT

## KEY BENEFITS

### Cleans VOC Free

No volatile organic compounds — safer for operators and the environment

### Integrated Flow Brush

Manual cleaning option with built-in flow-through brush for versatility

### Durable Cleaning Agent

Service life of several months — clumps paint particles for easy removal

### Saves Time & Money

Compact, mobile workstation — cleaning cycle in 15–30 minutes

HOW IT WORKS

## Compact and Universal

The ultrasonic cleaning station US-500 is a compact workstation, designed for companies that have to clean only a few parts per day and are looking for an environmentally friendly and cost-effective solution. The unit is on rollers and can be easily moved around. In addition to ultrasonic cleaning, you can clean parts manually with the integrated flow-through brush. Depending on the curing degree of the paint, a cleaning cycle lasts between 15 and 30 minutes.

The non-volatile cleaning agent, specially developed by Nanovis, clumps the detached paint particles together to form larger paint agglomerations that settle on the floor. The ultrasonic basin is then emptied sporadically to remove the paint sludge. Depending on the amount of ink and use, the cleaning agent has a service life of several months.

TECHNICAL SPECIFICATIONS

Specification	US-500
Trolley External Dimensions (L×W×H)	920 × 500 × 1,100 mm
Ultrasonic Bath Internal Dimensions (L×W×H)	500 × 300 × 200 mm
Stainless Steel Basket (L×W×H)	450 × 260 × 130 mm
Ultrasonic Output	500 Watt, 40 kHz
Electrical Supply	230 VAC / 50 Hz
Filling Capacity — Cleaning Agent	approx. 19 L
